**WADA STATEMENT**

No doping substance from the WADA prohibited substances list (in its last version) has been intentionally added to our products.

Naturex has implemented a policy to limit the risk of contamination with WADA prohibited substances on our sport nutrition line. This product line is identified by the letter W as third digit of the reference product code and product specifications clearly specify the molecules screened as well as the frequency of testing.

By consequence, our regular and generic product lines are not tested for WADA prohibited substances by Naturex and we thus give no warranty as to the absence of such WADA substances.

As a consequence, Naturex cannot be held liable for any damages resulting from the use by our customers of a product containing WADA prohibited substances.

*This declaration is valid for an indefinite period of time as from its insurance and can only be replaced by Naturex.*
